## **Moorestown Visiting Nurse Association Announces 2011 Flu and Pneumonia Vaccination Clinics**

(Moorestown, NJ) Now is the time to protect you and your family members against this season's flu virus according to Moorestown Visiting Nurse Association (VNA.) To meet community needs, seasonal flu and pneumonia clinics are being offered throughout the area and at Moorestown VNA's home office, a local organization which serves Burlington, Camden and Gloucester counties. (See attached list of flu clinic dates/locations.)

"Moorestown Visiting Nurse Association will hold at least 25 vaccination clinics open to the public this year," says Carole Rocco, RN, Community Health and Wellness Manager. "The 2011 flu vaccine includes protection against seasonal and H1N1 virus in one injection. We highly recommend vaccination right now in order to protect against the flu. Statistics show that most flu sufferers lose two weeks or more of work, school and personal time. Don't let this happen to you!"

The fee for seasonal flu immunization through Moorestown Visiting Nurse Association is \$30. Immunizations are available to adults and any person over the age of 9 with informed parental consent.

Pneumonia vaccinations are effective for 5 years, cost \$45 and are available to persons 18 and over. Both flu and pneumonia vaccinations are fully covered under Medicare “B” Primary.

In addition to public walk-in clinics throughout the region, Moorestown Visiting Nurse Association will offer seasonal flu and pneumonia vaccinations by appointment at their Moorestown office, 300 Harper Drive, every Monday through November 11 from 3 p.m. to 7 p.m. Appointments may be made by calling Denise Boothman at (856) 552-1302, extension 2196.

According to the Centers for Disease Control (CDC,) those who are at the highest risk of flu complications should be vaccinated early in the season. Those at the highest risk include people over the age of 50, residents of long-term care facilities, people aged 2-64 with chronic health problems, children aged 6-23 months, and pregnant women past the first trimester. The CDC recommends that all working people be vaccinated to prevent the spread of flu this year.

Seasonal/H1NI influenza vaccination is the primary method for preventing the flu and its potentially severe complications. The United States Public Health Service and The American Lung Association also recommend the pneumonia vaccine for all persons over the age of 18.

Founded in 1904, Moorestown Visiting Nurse Association is a non-profit organization that provides home care, private duty, hospice, counseling and community wellness services to families in Burlington, Camden and Gloucester counties. Information about the agency and upcoming flu clinics is available at (856) 552-1300, e-mail [services@moorestownvna.org](mailto:services@moorestownvna.org), or online at [www.moorestownvna.org](http://www.moorestownvna.org).
